

Quiz timer does not show in bottom window of IE 7.0 Browser

Problem:

When timing a quiz the timer does not show up in IE at the bottom of the window.

Solution:

Apparently IE7's security settings prevent whatever mechanism is used for the timer to appear in the left part of the status bar. You can resolve this issue, and possibly others by adding the <http://bb.beaufortccc.edu> URL to the list of trusted sites for IE. This can be done via Tools->Internet Options...->Security tab. Simply select the Trusted Sites icon and click the sites button. Then enter the URL, uncheck "Require server verification..." and click the Add button. I believe the browser has to be closed for this to take effect.
